### Study Centre

### Students Workbook

Total time of completing a Unit:: 22 to 25 hours

## Dolphin<sup>®</sup> – effective learning with the System.

*Description of the diagrams (page 2) and the procedure of a unit (page 3)*

The Dolphin System – The system consists of 18 units. It is possible to begin the Dolphin system at any time.

Find below a description of the four main components of the Dolphin system.

### **1) Multimedia lessons (virtual private lessons )**

Each exercise in the multimedia lessons is completed without the need of a teacher. You are instructed in each exercise what to do without the need of a teacher. You can therefore work completely independently from other students (everyone works at different speeds) and organise your time as you wish (without the need to make an appointment) and, a very important success point of the system is, that you can repeat any lesson as many times as you would like. You are also informed on-line about your progress. The system is easy to use. You are trained in all 4 language functions (reading, writing, listening and speaking) and we guarantee that everything is covered in the system.

Our teachers and teaching assistants are always available to help you.

After every multimedia lesson there are revision exercises in the workbook and also

### **2) homework**

which are related to the exercises in the system and consolidate the materials covered. You can check the work you have completed in your workbook with a key and the teacher will correct your written homework.

After two multimedia lessons and two workbook chapters you will have a

### **3) teacher lesson**

where you, along with a very small group of students, will reinforce and build upon the material covered in the multimedia lessons with one of our native speaking teachers. The focal point of these lessons is to concentrate on speaking and listening. You will work with teachers from different countries, exposing you thereby to a variety of accents. (most English speaking nationalities are represented.)

Parallel to the Dolphin training there is a wide variety of

### **4) Cambridge Club Activities**

giving you the possibility to practise different skills like conversation and grammar. In addition we offer business club activities covering the business skills Presentations, Business Hour, Business Correspondence, Telephoning in Business and Emailing. Social activities are also included Happy Hour and Breakfast Club. These club activities are included in the price of all the regular courses.

## **ESP - courses ( English for a special purpose)**

We offer special English training (ESP) to companies. We take the companies special needs into consideration and tailor our courses, with the help of our Director of Studies, to their expectations. This ESP training may entail 'one to one' or group training, furthermore we can combine the Dolphin system with ESP.

## Cambridge University Certificate Courses, UK (ESOL)

The preparation courses for the Cambridge certificates take place at a fixed time for groups of up to 8 students with one teacher. This ensures that each student reaches the necessary level for the exam.

We have a high success rate and guarantee good results. Please note that the exam dates are set by the Cambridge exam board and therefore the starting dates of the Cambridge courses are set. In order to guarantee a place on a course book in good time.
